## Instructional Budgeting and Schedule Development Process

# Overview

This document provides an overview of the process and the timeline used in determining annual instructional budgets for departments and in developing the schedule of classes. It also outlines important considerations that must be taken into account in thiprocess, such

budgetary constraints. This document will be called "Palistic Enrollment Capacity." The administrative co-chair will upload it to the Enrollment Management Committee webpage.

- 4. By week #8 of the previous academic year, Department chairs and supervising deans discuss both documents along with any other additional considerations relevant to the department. The Office of Institutional Research provides this data as well as technical assistance in interpreting this data, as they are able.
- By week #10 of the previous academic year, Department chairs and supervising deans meet with the Vice Chancellor of Academic Affairs and the faculty-cbair of the EMC (or designee)3 (o)3(ig)6 (neh)4 (e fa4 (I)3.1 8cr)1 (,)2 EMC4 (3 Af)5dy << TD [(de)-2</li>

# **Budgeting Considerations**

#### Data considerations (not limited to)

Program surplus/deficit reports - Finance and Administrative Services will publish a method of allocating revenue and expense that not only considers programs, but also overall college equilibrium of instructional offeings and services. (Total cost of operations.) Minimum FTEF needed to sustain certificate and degree programs for expected number of certificate/degree completions (minimum cost required) FTES FTEF Ratio of FTES to FTEF Census numbers and ourse fill rates Certificate/degree completion statistics Average class size Waitlist and other data that captures demand Overall departmental expenses (e.g., supplies, equipment, other personnel expenses) State funding formula impacts Nine or more units of CTE

### Importan t Conceptual Considerations

Equity goals for access, persistence from fall to spring, completion of transfervel Math/English in 1st year, graduation, transfer to a fouryear University Faculty with unique qualifications Total capacity in General Education courses Support for partnerships (e.g., SFUSD dual enrollment & credit recovery) Strategies for student recruitment, retention, and marketing Support for programs offered at the Centers and online Maximize the breadth of College offerings (e.g., ethnic studies) Support for economically disadvantaged students (look at Pell data and metrics), English language learners (look at ESL enrollments) and technologically disadvantaged students (look at Chromebook loaner **pg**ram.) Support for innovative new programs with high transfer/employment potential using data and metrics such as

- o LMI showing trending employment needs
- o CSU and UC transfer seats open

Future scheduling needs (American Families Plan, let's not end up like the airlines and rental car companies!)
